Javascript ES6/7/8 Node Express/FeathersJS/NestJS React/React Native with almost every popular or useful library in react ecosystem

Databases Postgres - Mongodb

PHP Laravel Wordpress Python Django PyQT5

My Work

I've gathered most of the technologies/features I've worked with in this project

- fully featured management dashboard based on react-admin
- fully responsive - support multiple languages - PWA
- works offline (data persistence/ queue actions)
- optimized to use the latest SEO needs/techniques
- runtime error reporting/usage analytics
- relational database multi role authentication local/OAuth
